Review

Dear Olga Nikolaevna!

Southern Ural PMES the branch of FGC UES, PJSC expresses its gratitude to the company SKB EP, LLC together with the company HUAMIN, LLC for the high-quality and useful on-site demonstration of the HUAMIN CV series OLTC with digital and traditional drives and for the demonstration of PKR-2M OLTC analyzer. During this demonstration were represented high technical developments of a wide range of OLTCs as well as flexible technical conditions for replacing the OLTC when repairing transformers.

Also, the specialists of our company highly appreciated the technical capabilities of the PKR-2M OLTC analyzer. This device allows you to obtain contactor oscillograms for a wide range of OLTCs without demounting and opening the OLTC tank.

We express our confidence in maintaining the existing friendly relations and hope for further mutually beneficial and fruitful cooperation.

Chief Engineer

A. V. Ageev
