Review of PKV/M7 instrument operation

Dear Olga Nikolaevna!

In response to the letter ref: 33272 dated 01.12.2021, we send you our review of SKB EP instrument.

Currently, in the electrotechnical laboratory of Tyumen Vodokanal, LLC PKV/M7 instrument is in operation. This equipment is used to analyze the condition of 6-10 kV oil-blast, vacuum circuit breakers. The instrument is convenient for us to use (5 stars out of 5). The following malfunctions were detected with the help of the instrument:

- non-simultaneous closing of pole contacts;
- the closing speed of switching devices was less than allowable according to the normative technical documentation.

PKV/M7 instrument is recommended for use by other organizations.

We allow you to post our review on the website: <https://skbep.com>

Chief Engineer  
Tyumen Vodokanal, LLC

V.A.Gursky
