

Omskenergo the branch of Rosseti Siberia, PJSC

ATTN: O.N. Ekaterinina
Director General
of SKB EP, LLC

Review about the devices' use

Dear Olga Nikolaevna!

With the following review we would like to tell you about the experience of use of the devices manufactured by Russian company SKB EP, LLC. We have been working with MIKO-8, MIKO-9A and PKV/M6N in Omskenergo the branch of Rosseti Siberia, PJSC.

MIKO-8 and MIKO-9A milliohmmeters have proven themselves well during DC resistance measurements of the windings of power and measuring transformers up to 110 kV inclusive, both in the lab and in the field. PKV/M6N circuit breaker analyzer allows to control the required time, travel and speed parameters of moving parts of oil, vacuum, SF6, and electromagnetic circuit breakers 6-10 kV.

No malfunctions were found during the use of the above-mentioned devices.
