Review of transformer OLTC diagnostic system PKR-2

Dear Olga Nikolaevna!

Our company is engaged in installation, start-up and commissioning, as well as repair work of electrical equipment.

In the course of the work, it became necessary to purchase the PKR-2 instrument, which in turn significantly simplified (made easier) reparation of the drives of the OLTC regulators of power transformers.

The instrument has a sufficiently informative screen, easy connection, it provides accurate measurements, and it is reliable and compact.

Also, the service functions that your company provides for the manufactured equipment are important.

Our company also used other instruments that your company produced. We can confidently recommend them for purchase by other companies.

Sincerely,

Head of the electrical
measurement laboratory
of Electroshield-Ufa LLC

V.V. Ivanov
