Review to the devices manufactured by SKB EP, LLC

MIKO-7M milli-ohmmeter has been operated at the Krasnoyarsk Power and Mechanical Plant since May, 2019.

The device has a clear software, a user-friendly interface, the device itself is easy to use in work.

The declared characteristics of the device are fully confirmed in practice.

The advantages of the device are its compact size, light weight and the ability to work from the network.

In addition, the device demonstrated good repeatability of the result, a wide range of resistance measurements, the possibility of manual adjustment of the test current.

We recommend this device for use in specialized enterprises.

The device was recommended to be purchased by the employees of electro technical laboratory of Tomskneftekhim, LLC.
