RE:Reference

Dear Tatiana Olegovna,

In 2018, our company purchased the MIKO-9A device. In this instrument, our employees like the versatility of the device and its size. Carrying bag, in which you can fold all the cables and the necessary tools, is very convenient. Among the features of the device, we highlight the high accuracy of measurements with the ability to save results. Pleased with the high autonomy of the device, the battery lasts for several dozen measurements.

During the use of the device, failures in its operation were not detected.

Considering the above, we can recommend MIKO-9A for various laboratories (mobile and stationary) and we allow the use of feedback for advertising purposes.

Sincerely, Head of Tayshetskaya
