About MIKO-1 operation

Dear Olga Nikolaevna!

Magadanenergo, PJSC, informs you that MIKO-1 device has been successfully used in Southern Electrical Grids for more than 10 years. During operation MIKO-1 has proven itself positively due to its simple operation, compact design, light weight, and special carrying case. This device is convenient to use and can be used directly at the installation place of electrical equipment.

High quality of assembly as well as accuracy of measurements of the device MIKO-1 allowed us to improve the quality of control for the required parameters during repair and service operations.

Acting Deputy chief engineer –
Head of the Department of operation,
repair and technical re-equipment
of electric networks

L. S. Kolbina
