**ATTN: O.N. Ekaterinina  
Director General  
of SKB EP, LLC**

**Dear Olga Nikolaevna!**

Nowadays, the following instrument PKV/M7 of your production has been in the possession of the Techtrans LLC electrotechnical laboratory since 2020.

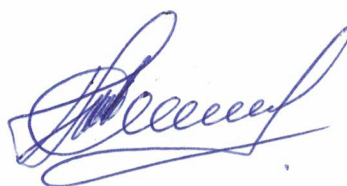

With the help of this instrument we carried out measurements and diagnostic of vacuum circuit breakers (BB/TEL-10, SION ZAE5, EasyPact EXE, SIMENS ZANZ): SF6 type (VEB-UETM-110).

PKV/M7 instrument established itself from the best side. It is simple and convenient in operation, and has a high measurement accuracy at the same time. Its use allows you to significantly save time for electrical equipment diagnostic and improve the quality of repair and diagnostic.

The advantages of PKV/M7 are: reliability; simplicity and ease of use; small weight and dimensions of instruments; PKV/M7 design in a shatterproof housing, that is very important for constant transportation and operation in the field.

We express gratitude to SKB EP, LLC for high-quality and reliable products and recommend SKB EP`s instruments to other organizations and hope for further cooperation.

Director

Agaev R.M.
